

## **Traction Master™ Technology With Long-Lasting Appeal**

Waterproof composite decking  
engineered for durability and longevity.

## Traction Master Technology

### Beautiful From Every Angle

Completely enclosed boards that feature a matte finish and natural graining.

It doesn't matter where you use RENEW Decking, both sides of each board are finished, giving you a professional, real wood look and feel from all vantage points. Whether your deck is ground-level or two-stories up, our completely enclosed boards offer a solution that will stay safe and beautiful for decades.

***A high-quality, traction-maintaining, and low-maintenance option for decking and docks that will last a lifetime.***

An industry-leader, RENEW Decking brings an authentic look and feel to your backyard, business, boat dock, and more. Using our latest Traction Master technology, RENEW Decking is one of the safest, most durable and long-lasting surfaces you will find.

### Color You Can Count On

Our popular variegated color options give you the flexibility to easily match existing color schemes and décor:

- **Beach Sand**
- **Weathered Cedar**
- **California Redwood**
- **Coastal Driftwood**

### Fascia and Risers

RENEW Trim is designed and engineered lumber for a variety of projects. All our trim boards have one textured side and one smooth side, delivering extra design flexibility whether you want a smooth finish or wood grain appearance. The available solid non-variegated color options easily complement RENEW Decking for a cohesive look.

- **Beach**
- **Weathered**
- **California**
- **Coastal**
- **White**

## Why Choose RENEW Decking?

Stay safe and beautiful for decades with slip-resistant, rot-resistant, and weatherproof decking.

RENEW Decking is the only waterproof composite decking board with no organic fillers. That means your decking will not peel, rot, splinter or weather — and it will never absorb water. Plus, you will never have to stain, sand or paint our decking. And cleaning it, in most cases, is as simple as a quick wipe down or spraying with a hose.

- **Superior Slip-Resistance:**  
Exclusive Traction Master technology for maximum grip and slip-resistance even when wet.
- **Long-Lasting Value:**  
Quality and beauty designed to last a lifetime
- **Entirely Waterproof:**  
Safe for ground contact installations, and ideal for all pool types.
- **Sustainably Produced:**  
Eco-friendly engineering that is good for your deck and good for the environment.

## 100% Waterproof Inside and Out

RENEW Decking boards are made out of a single continuous material that blocks moisture. This means that every side, every face, and every core of our boards is protected.

- **Resists internal rot, mold, and insects.**
- **Will not break down or absorb moisture even when boards are cut or screws and fasteners are inserted.**
- **Safe for ground contact installations without worrying about damp soil rotting the bottom of your decking boards.**

# Traction Master Technology

## Industry-Leading Waterproof Traction

Our products are designed and engineered using RENEW Decking's exclusive Traction Master Technology. Our deep grained surface texture provides industry-leading slip resistance for increased peace of mind in all types of conditions.

While some composite decks are known to have slippery surfaces, RENEW Decking's advanced waterproof design provides slip-resistance even when wet.

- **Perfect for both decks and docks**
- **Withstands all seasons and all climates, from Alaska snows to the Florida sun and sea.**
- **Ideal for all pool types: chlorine, saltwater, or freshwater**

## Eco-Friendly Production

Our product's life cycle is engineered to not only be good for your deck, but also good for the environment.

- **RENEW Decking is composed of our blend of recycled post- consumer/pre-consumer and virgin High Density Polyethylene, along with non-organic strengthening additives, which provides the durability to last a lifetime.**
- **Since RENEW Decking has no organic compounds, our manufacturing doesn't contribute to deforestation.**
- **In our pursuit to zero-waste, our facilities re-use their own excess to make brand new boards.**
- **Because our product is so durable and long lasting, it means less post-use waste over time.**

# Lasts A Lifetime With Low Maintenance

RENEW Decking has been designed and engineered to last for decades with minimal upkeep. Our unique deep-grain design has the attractive appearance of lumber without the cost and maintenance of real wood.

- **Saves Time and Money:**

No need to paint, stain, or seal your deck. Once you choose the color, you won't have to worry about it chalking, fading, or developing a patina.

- **Easy to Clean and Sanitize:**

RENEW's closed-cell structure makes it easy to remove dirt and grime. This reduces the chance of your patio furniture, grill, or flower pot leaving stains and spots on the deck.

- **Mold and Mildew Resistant:**

Mold and mildew cannot be absorbed into RENEW Decking. If mold or mildew happens to appear on the surface of your decking, simply wipe it clean with soap and water or a mild household cleaner.

## Leaders in Longevity

Traditional wood decking only has a lifespan of about 15 years, even with routine maintenance. RENEW Decking stands up to the elements every season and any climate, and our durability is guaranteed with industry-leading warranties.

- **Over 45 Years of Decking Expertise:**

For years we've been making decking people can count on. Many of those early RENEW decks are still in use today.

- **25-Year Worry-Free Performance Warranty:**

Guarantees your deck will look as good as the day you install it for decades to come.

- **25-Year Fade and Stain Limited Warranty:**

Once you choose the color, you will not have to worry about it chalking, fading, or developing a patina.

**Experience Decking,  
Built From The Ground Up.**

## Installation Info

RENEW Decking & Trim can be fabricated and installed with the same tools as wood lumber. This product will cut and drill very cleanly. There is no grain to split or chip and no knots to bind tools or bend fasteners. Standard safety equipment should be used when working with the material. Most decks use 16" on center spacing for joists. Please reference our installation guide at [www.renewdecking.com/resources](http://www.renewdecking.com/resources).

### Square

Square edge boards create traditional, gapped-board installations. They can be installed with the screw-down method.

### Groove & Groove

Groove and groove boards mimic the look of traditional gapped decking but float on deck clips, for added stability without a visible fastener.

### RENEW Trim

RENEW Trim is available in 5/8" x 12-5/32" Square Edge for fascia and 1/2" x 8" Square Edge for stair risers.

- RENEW Trim is available in white and four complimentary colors
- Solid non-variegated colors - one side textured and one side smooth
